

# Nano-Enhanced Aerospace Interiors (NEAT)

**Project Ref : MAA 243**

**Grant Awarded:** £148,898

**Duration:** 18 Months

**The project will leverage graphene's unique properties in novel aerospace interior composites to give:**

- ➔ Enhanced fire, smoke and toxicity performance
- ➔ Increased mechanical performance allowing weight reduction and reduced fuel costs
- ➔ Improved handling and surface finish
- ➔ Reduced production costs
