

Graphene REACH Registration Consortium

REACH Registration of Graphene and Graphene Oxide

The GRAPHENE REACH REGISTRATION CONSORTIUM, consisting of the members Applied Graphene Materials UK Ltd., NanoXplore Inc. and The Sixth Element (Changzhou) Material Technology Co. Ltd., is proud to announce that Joint Registration Dossiers for Graphene and Graphene Oxide have been submitted to ECHA prior to the May 31st, 2018 REACH Deadline.

A Joint Registration Dossier for reduced Graphene Oxide is currently being prepared for a tonnage band of up to 10 t/a and submission is expected to be completed by end of 2018.

Graphene and Graphene Oxide can now be used with 10 t/a without any restriction in Europe from manufacturers/importers having participated in the Joint Registration. Work for dossier updates to higher tonnage bands (10 to 100 t/a) will start soon.

Interested manufacturers or importers of the named substances may contact Consortia Management GmbH for further information regarding joining the Consortium or buying a Letter of Access (LoA).
