

# Car care

## Innovate with graphene

APPLIED  
GRAPHENE  
MATERIALS

Ceramic  
sealant

Alloy wheel  
wax

Snow  
foam

Detailing  
spray polish

Paste body  
wax

Graphene has the potential to reinforce coatings and offer greater surface protection over time.

Your product could benefit from increased **HYDROPHOBICITY** and reduced water spotting, greater **UV ABSORPTION** and **CHEMICAL RESISTANCE**, as well as improved **ANTI-CORROSION** and **BARRIER** performance.

“AGM has been instrumental to our R&D process through technical support and a reliable supply of raw material.”

Mike Cipriani, Founder of Infinity Wax

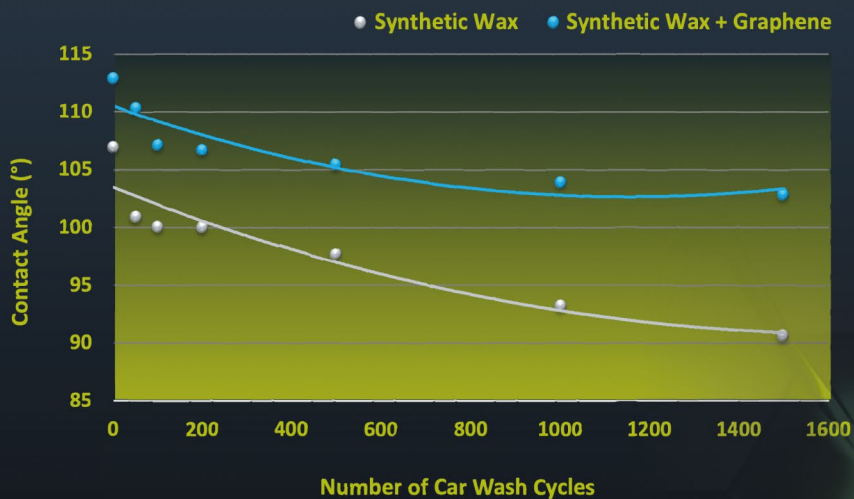

**STABLE, EASY TO FORMULATE** and **SAFE TO INCORPORATE** for consistent, reliable performance enhancements in **REAL LIFE** applications.

Our user-friendly **Genable<sup>®</sup>** graphene dispersions are formulated to ensure long term in-can stability.

- Environmentally friendly and easy to incorporate
- Safe to handle and available in a range of media
- Optimised to enhance performance

## The Benefits of AGM **Genable<sup>®</sup>** Dispersions in Synthetic Car Wax

AGM customers have direct access to our technical expertise for the evaluation and adoption of graphene nanoplatelets into their formulation.

Through our Innovation Accelerator we can share the development and testing burden to reduce costs and the time to market for your new product.

Proud to be a leading innovator in graphene dispersion and application technology

**WE ARE GRAPHENE.**
